EDUCATION

- **Bachelor of Technology in Artificial Intelligence and Machine Learning** 2022-25
UNIVERSITY SCHOOL OF AUTOMATION AND ROBOTICS Surajmal Vihar New Delhi CGPA: 8.84
- **Diploma in Engineering** 2017-2020
JAMIA MILLIA ISLAMIA, New Delhi Percentage: 87.86

TECHNICAL SKILLS AND INTERESTS

Languages: JAVA, Python, JavaScript, HTML+CSS
Libraries : Python Libraries:PyTorch, TensorFlow, Keras Matplotlib, Scikit-learn, CV2
Web Dev Tools:MERN Stack, Tailwind CSS, Django, Flask, VSCode, Git, GitHub, Docker, Kubernetes
Machine Learning Frameworks: TensorFlow, Keras PyTorch, Sklearn
Databases: PostgreSQL,MongoDB
Areas of Interest: Machine Learning, Deep Learning, Generative AI
Soft Skills: Problem-Solving, Fast-learning, Presentation, Adaptability

PERSONAL PROJECTS

- **Indian Constitution AI Agent** Live
An AI chat app for all Indian Constitution related needs. GitHub Repo
 - Designed an AI agent for answering queries related to the Indian Constitution using a Retrieval-Augmented Generation (RAG) framework.
 - Leveraged LlamaIndex for document indexing, Pinecone for embedding storage, and Gemini LLM for query understanding and response generation.
 - Developed an interactive web interface using Streamlit to enhance user accessibility and streamline query responses.
 - Evaluated the system using RAGAS (Automated Evaluation of Retrieval-Augmented Generation), achieving high faithfulness, answer relevance and Context Relevance.
 - Technology Used: Python, LlamaIndex, Pinecone, Generative AI, Streamlit
- **Blogging Platform** Live
A Full-Stack Blogging Platform made with React and Appwrite. GitHub Repo
 - Developed a responsive blogging application using React for the frontend and Appwrite for backend services, enabling secure user authentication and real-time data management.
 - Created a blog platform with a modern React-based frontend and Appwrite backend, featuring CRUD operations, user authentication, and real-time content updates.
 - Built an interactive and responsive blogging site utilizing React for user interface and Appwrite for backend support, emphasizing usability, security, and seamless data handling.
- **Flight Price Prediction Website** GitHub Repo
A website that uses Machine Learning to predict flight price based on input parameters.
 - Developed and implemented machine learning algorithms with 98% accuracy to predict flight prices based on various input parameters, enhancing user experience and aiding in informed decision-making for travellers
 - Designed and deployed a user-friendly website interface, integrating the predictive model seamlessly to provide flight price forecasts, improving accessibility and convenience for users.
 - Technology Used: Python, Scikit-learn, HTML, CSS, Flask.

EXPERIENCE

- **Machine Learning Intern** JUL - AUG 2024
ARCedtech Remote
 - Develop a smart chatbot that can explain the Sustainable Development Goals (SDGs) in an engaging and interactive manner
 - Deploy and integrate the chatbot into an existing website, ensuring it seamlessly complements the current design and functionality
- **Machine Learning Intern** FEB - APR 2024
FEYNN LABS SERVICES Remote
 - Prepared a Report on Product Idea which will Primarily use ML and AI to solve real world business problems.
 - Used Data Analysis techniques to Segment Real World Business Markets and Industries based on market variables.
 - Worked with a team of 5 members and learnt how to deal with Real World Data.
