

B Bhakta Varun

Bachelor of Technology
Artificial Intelligence and Machine Learning
Guru Gobind Singh Indraprastha University EDC New Delhi

Contact No. : +91-9625609705
Email: bhaktavarunbollapragada@gmail.com
GitHub Id: CodeSage4
LinkedIn Id: bbhaktavarun
Portfolio: codesage4.vercel.app

EDUCATION

- **Bachelor of Technology in Artificial Intelligence and Machine Learning** 2021-25
UNIVERSITY SCHOOL OF AUTOMATION AND ROBOTICS Surajmal Vihar New Delhi

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML+CSS
Libraries : Python Libraries:PyTorch, TensorFlow, Matplotlib, Scikit-learn, OpenCV, YOLOv8, GRAD-CAM++
Web Dev Tools:React.js, Tailwind CSS, Django, Flask, VS Code, Git, GitHub, Docker
Data Analytics Tools: Microsoft Excel, Microsoft Power BI, Tableau
Machine Learning Frameworks: TensorFlow, PyTorch, Sklearn
Databases: PostgreSQL, MongoDB, MySQL
Soft Skills: Analytic Thinking, Teamwork, Presentation, Adaptability

PERSONAL PROJECTS

- **Extractive Text summarization using BERT** GitHub Repo
A robust AI-powered web app for querying and chatting with your documents.
 - Fine-tuned BERT for extractive summarization, achieving 85 percent accuracy on a custom dataset of news articles, reducing reading time by 50
 - Built a user-friendly Streamlit app for interactive model testing and live summarization.
 - Technology Used: **Python, Streamlit**
- **Real-Time Classical Dance Recognition** GitHub Repo
Developed a ResNet18-based model to classify classical Indian dance forms from live video feed in real-time.
 - Designed a ResNet18-based AI model that classifies Indian dance forms from live video with 90
 - Integrated Grad-CAM++ for explainability, ensuring the model focuses on dancer movements instead of noise.
 - Technology Used: **Python, ResNet18, PyTorch, OpenCV, XAI**
- **Developed game prototypes in Godot** GitHub Repo
with a focus on character movement, physics, and interactive gameplay.
 - Implemented slime character logic, fixed movement bugs, and optimized wall collision handling.
 - Collaborated with a team to design game mechanics and AI behavior.
 - Technology Used: **Godot, Gd Script**

EXPERIENCE

- **Internship cum Minor Project | Co-Agent - Multi-Agent Conversational Framework Library** *SEPT - DEC 2024*
Prodigal AI Remote
GitHub Repo
 - Automated Blog-to-Post Transformation: Leveraged AI agents for web scraping, data formatting, and Linked In optimization, reducing post creation time by 40 percent and boosting engagement.
 - Collaborative Multi-Agent System: Enabled iterative content refinement using Google Gemini for advanced NLP and dynamic task delegation.
 - User-Friendly Interface: Built a Streamlit UI for live input and previews, enhancing user experience.
 - Seamless Integration: Published the framework as a Python package on PyPI for easy adoption and scalability.
 - Technologies: Python, Streamlit, Poetry, Google Gemini API, Multi-Agent Systems, Git/GitHub
- **Internship | Shoe Size Estimation using A4 paper as a reference** JUN - AUG 2024
Kaptable Remote
 - Developed and optimized models for foot detection and measurement, improving accuracy by 15 percent
 - Implemented a reference scaling mechanism using A4 paper dimensions, achieving precise shoe size calculations with an error margin of 2mm.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** Expected July 2025
Amazon Web Services (AWS)
